

Ponderosa (Yellow) Pine, Giant Sequoia/Sierra Redwood

Pinus ponderosa, Sequoiadendron giganteum

These two magnificent trees were started from seed at the turn of the century. The original owner moved to the area from California and built what was to be the first house on the street. The current house was built in 1926, long after the seeds germinated and the two trees were well established.

The Ponderosa pine is perhaps the most far ranging and best known of western North American Pines. It is prized for its jigsaw-puzzle like bark.

Giant Sequoias are the most massive of all trees and are well adapted to the Pacific Northwest.

Both trees were dedicated November 4, 2000.
